*beautiful wedding photography  
...that captures your day*

We're all familiar with the common complaint about photographers – the time they take.

Philip is different. Working smoothly, efficiently and with minimum fuss his photographs are natural and relaxed. It's your wedding, not a photographic shoot. By careful preparation Philip takes all of the photographs you want, recording each magic moment, without taking over.

Another secret of Philip's success is the pre-wedding discussion with you and your fiancée. This usually happens just before the wedding. You tell him your plans and together you work out what photographs you would like. This saves wasting time on photographs you don't want and also any extras you'd like are not forgotten in the rush of the day. You'll find you work together as a team.

Philip is a qualified Master Photographer with more than twenty years professional experience.

Philip's photography uses the power and creative freedom of digital with printing by a professional laboratory onto traditional, robust silver halide paper for great memories to last a life-time.

No two weddings are the same for Philip. There are no packages, every wedding is individual.

### Thank you letters

*"We both wanted to thank you for your cheerful personality and professionalism on our wedding day. The results were fantastic and we are overjoyed with the photos. We just can't wait to start showing them to people. Thanks again."*

Rachael & Garry

*"We just wanted to say what a fantastic job you did. The photographs were excellent, perfectly composed, and captured the atmosphere beautifully. So many of our friends have complimented the finished pictures. We were impressed by the care taken to visit the previous day to discuss our ideas for the locations and poses. What we also really appreciated was that you managed the guests with a subtle efficiency that meant that no-one was kept waiting. That contributed enormously to what we can honestly say was the best day of our lives."*

Mike & Catherine Green

*"One of the best parts of my job is seeing the bride's face as she looks through her album for the first time".*
